

CPD Event: Understanding and Managing Connectivity

5th & 12-13th May 2022

The BSG Committee for Professional Geomorphologists invite BSG members across all sectors to join them for a two-part event in May 2022. On 12th May we will be meeting at **Farm ED, near Shipton-under-Wychwood, Oxfordshire**. We will visit sites in the Evenlode catchment where techniques have been used to improve and restore the balance of connectivity, including 'stage zero' and 'NFM'. There will be an optional extra site visit on the 13th.

To maximise time for networking and discussion, we are running an **online session** in the preceding week, consisting of presentations from academic, landowner and regulator perspectives, and lightning talks from postgraduates and river trusts.

To indicate expressions of interest for attendance and/or a delivering a lightning talk, please follow the link and fill in this [form](#) by **21st February 2022**.

Please note: the event is free of charge for BSG members excluding travel and accommodation (more details to follow on where to stay). If finance is a barrier to your attendance then please get in touch, as we have limited funds for those whose organisations cannot provide any funds.

If you have any questions please contact
matilda.biddulph@environment-agency.gov.uk.

We look forward to seeing you soon!
